The Greatest Flying Stories Ever Told: Nineteen Amazing Tales From The Sky

Synopsis

At 10:35 in the morning of Thursday, December 17, 1903, man got his wings. On the sand dunes of Kitty Hawk, North Carolina, Orville Wright flew the motorized aircraft he and his brother Wilbur had constructed to a distance less than the length of the wingspan of today's 747 jet. Three other flights were made the same day, the final lasting 59 seconds for a distance over the ground of 852 feet. Mankind was finally off the ground in powered flight. Not a balloon . . . not a glider . . . in an airplane with wings and a motor. And his experiences in the air would forevermore join the literature of human endeavors, to be shared by kindred spirits or the curious who have wanted to know, What was it like up there? In *The Greatest Flying Stories ever Told*, Lamar Underwood collects the very best writings, both fact and realistic fiction, on man's fascination with flight, culled from the various magazines, books, plays, and films that serve to lay bare the drama of human beings coping with the skills and devices that enable them to direct their machines through the vastness of the skies. Customer Reviews

This book gives you a great overview over a whole lot of great flying stories. After I finish reading

this book, I will certainly get a hold of some of the books from which the excerpts in this book origin. It's a very pleasant read and I highly recommend it to anybody fascinated by aviation. Just one thing to keep in mind: Most of the stories date back some time, which gives them a bit of nostalgic touch.

I admire planes and pilots, normally enjoy reading about them. I subscribe to Smithsonian "Air and Space" magazine. But these stories are so lame, I could barely keep my eyes open. This book is in my opinion, unreadable.

Great.

I bought this book for a friend who is a pilot. He enjoyed it.
