## **Customer Reviews**

So nice to see a book with organized, practical advice on how to help your little one make and keep friends. I was worried that it would encourage more "helicopter parenting" but it really doesn't. It encourages parents to train kids so they can make their own friends and solve their own problems. The book helps with ways to support your child, but doesn't make you think you're supposed to do everything for them. This is a great book for any parent, but especially helpful if your kid is struggling and you're looking for a better way to help.

Hands down the best parenting book ever! Dr. Frankel gives parents the skills to coach your child in a gentle and positive manner. As a coach the parent supports from the sidelines, allowing the child to be center in the development of friendship and problem-solving skills. The material is clearly laid-out, with a checklist at the end of each chapter, which I found very helpful as a quick reference or cheat-sheet. This book helped me to give my children small successes, which they could build upon, and in turn helped me to have parenting successes which I could build upon. As a teacher this book has been tremendously helpful in supporting children who are lonely and alienated/alienating. In my experience, children want to be successful and to have positive relationships, but many are lacking the skills. Dr. Frankel's book provide the skills for success.

I feel that this book should be a mandatory reading for Kindergarten parents.

Helped me gain a direction for my kids and their friend making. Nice job with the book. And requires too many words in these reviews so this is filler words and you can safely ignore this sentence.

Great resource
