Dinosaur!: Based On The Acclaimed Four-part A&E Television Series Hosted By Walter Cronkite

Synopsis

Full-color photos. "From cover to cover, this openly invites the reader to discover the delights of dinosaurs. The visual appeal is impressive. The text is informative. Fossilization, skeleton reconstruction, and a superb time scale round out a stunning and compelling book. Complete, authoritative, exact, and imaginative, it is sure to survive when other dinosaur books become extinct."--(starred) "Science Books Films. "

Customer Reviews

Norman's Dinosaur! brings the Paleontology to life by telling this science history with vivid descriptions of the first dinosaur fossil hunts and interpretations in the first chapters, so the reader may follow how the facts and thoughts about the dinosaurs evolved and understand their importance to the modern man and it's an almost unique approach. Norman proceeds by showing how the dinos arose, how they lived, their classification and some extinction hypothesis. The book is very well written and beautifully illustrated, presenting scientific information for all kinds of readers that want a better general view, except if you are looking for a real scholar text. Due to all of it, it is an excellent book by this price and a must for everyone who would like to know more about the terrible lizards.

I purchased this book as a prize for a 5th grade boy during a recent school dinosaur project. He needed something more advanced than the basic books you can get for children in the "all about dinosaurs" or the "100 dinosaurs to know" genres. He picked this one out himself and it should be

enough to challenge him for a while. I think that it covers a lot of good topics, especially in the "how did scientists figure it out" category. It is now an older book, but covers all the way up to the discoveries in China that document dinosaur feathers, Montana finds that document dinosaur communal life and parenting (Maiasaurus and others) and discusses whether dinosaurs were warm blooded.

This book was everything advertised, it has good information , and I think the dinosaur fan would really enjoy it, a hit, in my opinion, respectfully!!
