Right-Brained Place Value

Synopsis

Right-Brained Place Value is an effective way of teaching addition & subtraction for numbers larger than 10 - no matter how much children have struggled to remember math facts before.

Right-Brained Place Value strategically builds on Right Brained Addition & Subtraction and all computation done in this book is based on the facts to ten, which the children already know! Very young students will easily master the concept of place value because instruction targets multiple regions in the brain at one time. Color, story problems, action, patterning and fun math games - all these elements turn math from dreaded to doable! Over 150 pages of reproducible resources (including answer keys and math worksheets) make lesson preparation easy for the teacher. 224 pages total.
